What's more, there are more than 90 independent sellers moving lift truck materials and materials handling equipment. This network helps Doosan Infracore America to aggressively compete in this competitive marketplace. The forklift product line impressively features 63 distinctive models consisting of 82 various battery and engine configurations of Electric-powered and Internal Combustion vehicles. Capacities of these numerous truck designs range from 3,000 to 33,000 lbs. All vehicles are designed in an ISO 9001 qualified facility.

Doosan Infracore America is the fastest growing forklift business in the North American market, due to their consistency in maintaining a high level of customer service excellence and optimum product functioning to all Doosan Infracore Lift Truck users. The U.S. forklift division located in Cleveland has a skilled team knowledgeable in Sales, Purchasing, Marketing, Logistical and Technical Support.

Initially the domestic lift truck marketplace in Korea was an open import enterprise. Korea Machinery Co. Ltd. begun in 1960, to import fully assembled lift trucks as part of a domestic machinery expansion project. Sales of these products were initially targeted to state-run firms, large scale corporations, and the military. This ultimately led to a merger with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division begun trade operations throughout Korea to overhaul and sell this heavy equipment. By 1978, a lift truck manufacturing plant was successfully completed. Continuous technical instruction grew to become the new focus for enhancing quality and product development.

Home-based lift truck trade for Daewoo started in 1967 and grew to an amazing 90% market share in Korea. By the 1980's, Daewoo's advanced technological advancements combined with sales success placed them in a situation of considerable growth of their forklift operations.

Caterpillar Industrial Inc. of the U.S. in 1981, proposed a joint venture project to assist them in the highly competitive North American materials handling market. This joint-venture proved highly successful for Daewoo and their lift truck product sales expanded greatly. In 1984, the company completed development of a new facility to help in manufacturing high end value-added goods for export. In 1993, the company had a international sales system and started exporting versions they had developed through in-house expertise, as an independent product. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing growth possibilities into overseas marketplaces.
